

About the NTP

The Networked Trade Platform (NTP) is a one-stop trade and logistics ecosystem which supports digitalisation efforts and connects players across the trade value chain – in Singapore and abroad. It aims to provide the foundation for Singapore to be a leading trade, supply chain and trade financing hub.

DIGITALISE • CONNECT • GROW

One-stop platform for all your trade
and logistics needs

DIGITALISE

Enhance your trade efficiency by going digital.

Go beyond manual paperwork and open the gate to true digitalisation. Let the NTP help your business improve trade efficiency by enabling the transformation process: create and reuse data on a single platform.

- Store and manage your documents and data easily and securely on the NTP
- Save time on data re-entry and improve data accuracy by reusing and sharing your documents and data from source with business partners and for government applications through the NTP
- Collect digital data across your trade ecosystem for ease of analysis and planning

CONNECT

Be connected to the wider trade ecosystem seamlessly.

With the NTP, all it takes is one connection for you to conduct your trade transactions with partners and providers seamlessly.

- Minimise the cost and effort to connect with your trade partners
- Connect and collaborate locally and overseas with new and existing partners
- Apply for trade-related e-services directly with Singapore Customs

GROW

Expand your business capabilities with Value-Added Services.

Together with third-party providers, the NTP offers a marketplace of Value-Added Services (VAS) to support your evolving business needs. The range of services include those that allow you to arrange shipments easily, improve cash flow, and better manage trade compliance.

The NTP also aims to foster innovation in the trade ecosystem. VAS providers and independent developers can tap on the platform's innovative infrastructure and developer toolkits – such as data Application Programming Interfaces (APIs) and a sandbox – to build and enhance services.
